Experience

2024-2025
Freelancer
Frontend developer

I am Kaja Nagur, a passionate and driven individual from Tiruvallur, Tamil Nadu. I completed my schooling at DRBCCC School in Tiruvallur, where I secured a 67% in my higher secondary education. I went on to pursue a B.Tech degree in Electronics and Communication Engineering (ECE) from GRT Institute of Engineering and Technology (GRIET), where I achieved a CGPA of 8.3. I have a strong interest in frontend development and have gained practical experience working with technologies like HTML, CSS, JavaScript, and React. I am eager to leverage my technical skills and educational background to contribute to and grow in the field of frontend development.

Project

As part of my hands-on experience in frontend development, I have worked on several projects that showcase my skills. These include a Calculator application, where I implemented basic arithmetic functionalities with a clean, user-friendly interface. I also developed a Portfolio Website to display my work and projects, highlighting my skills and design abilities. Another project is the Amazon Login Page, where I created a replica of the login page, focusing on responsive design and form validation. I also worked on the Udemy Front Page, which helped me refine my skills in creating a dynamic, user-centered interface. Additionally, I built a simple Guess the Number game that utilized JavaScript for logic and interactivity. Lastly, I developed a Company Web Page, which involved structuring a professional site with key pages and features, emphasizing responsive design and smooth user experience.

SKILLS

- 1.html
- 2.css
- 3.java(basic)
- 4.javascript
- 5.c program
